Our History

Deruta is our splendid village where ceramics have been produced for centuries.

The majority of the population has always lived on the production of these artefacts. In 1976 Marcello Preziotti, the founding father of Vania Srl, also began his journey in this area of craftsmanship. He carries out his work assiduously and with passion in the shop under his house, together with his wife. Subsequently he began to include his daughter Vania in the business who would take over the reins in the year 2000, transforming the small shop under the house into one of the most important companies in the area. In these years of activity, Vania together with her husband Carmelo and daughter Elisa, have constantly aimed at growth, quality and satisfying customer requests by always offering innovative products.
